

We Transform Homes

MAGPPIE
SINCE 1998

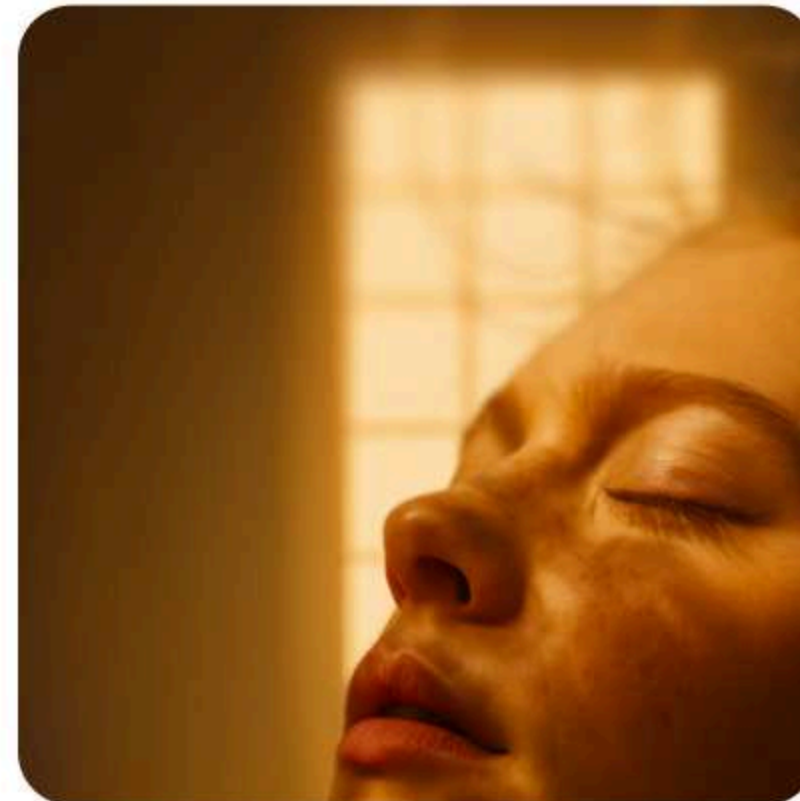

Since 2012,
we have been innovating
Wellness Materials used
in our home construction.

With our understanding of Material Science,
We have created a **Wellness ecosystem.**

WELLNESS
STONE

WELLNESS
LIGHTING

WELLNESS
KITCHEN

WELLNESS
WARDROBE

and with all the materials
in our ecosystem,

**We Transform an
ordinary home into
a Wellness Home**

THE BIG PROBLEM

Currently most building materials have toxic substances like **formaldehyde**, which leads to many health issues in our family, like **Asthma, Cancer.**

World Health Organisation
and American Cancer Institute
have reported all compressed
wood materials like MDF, HDF,
plywood and particle boards to be

CANCER
CAUSING

World Health
Organization

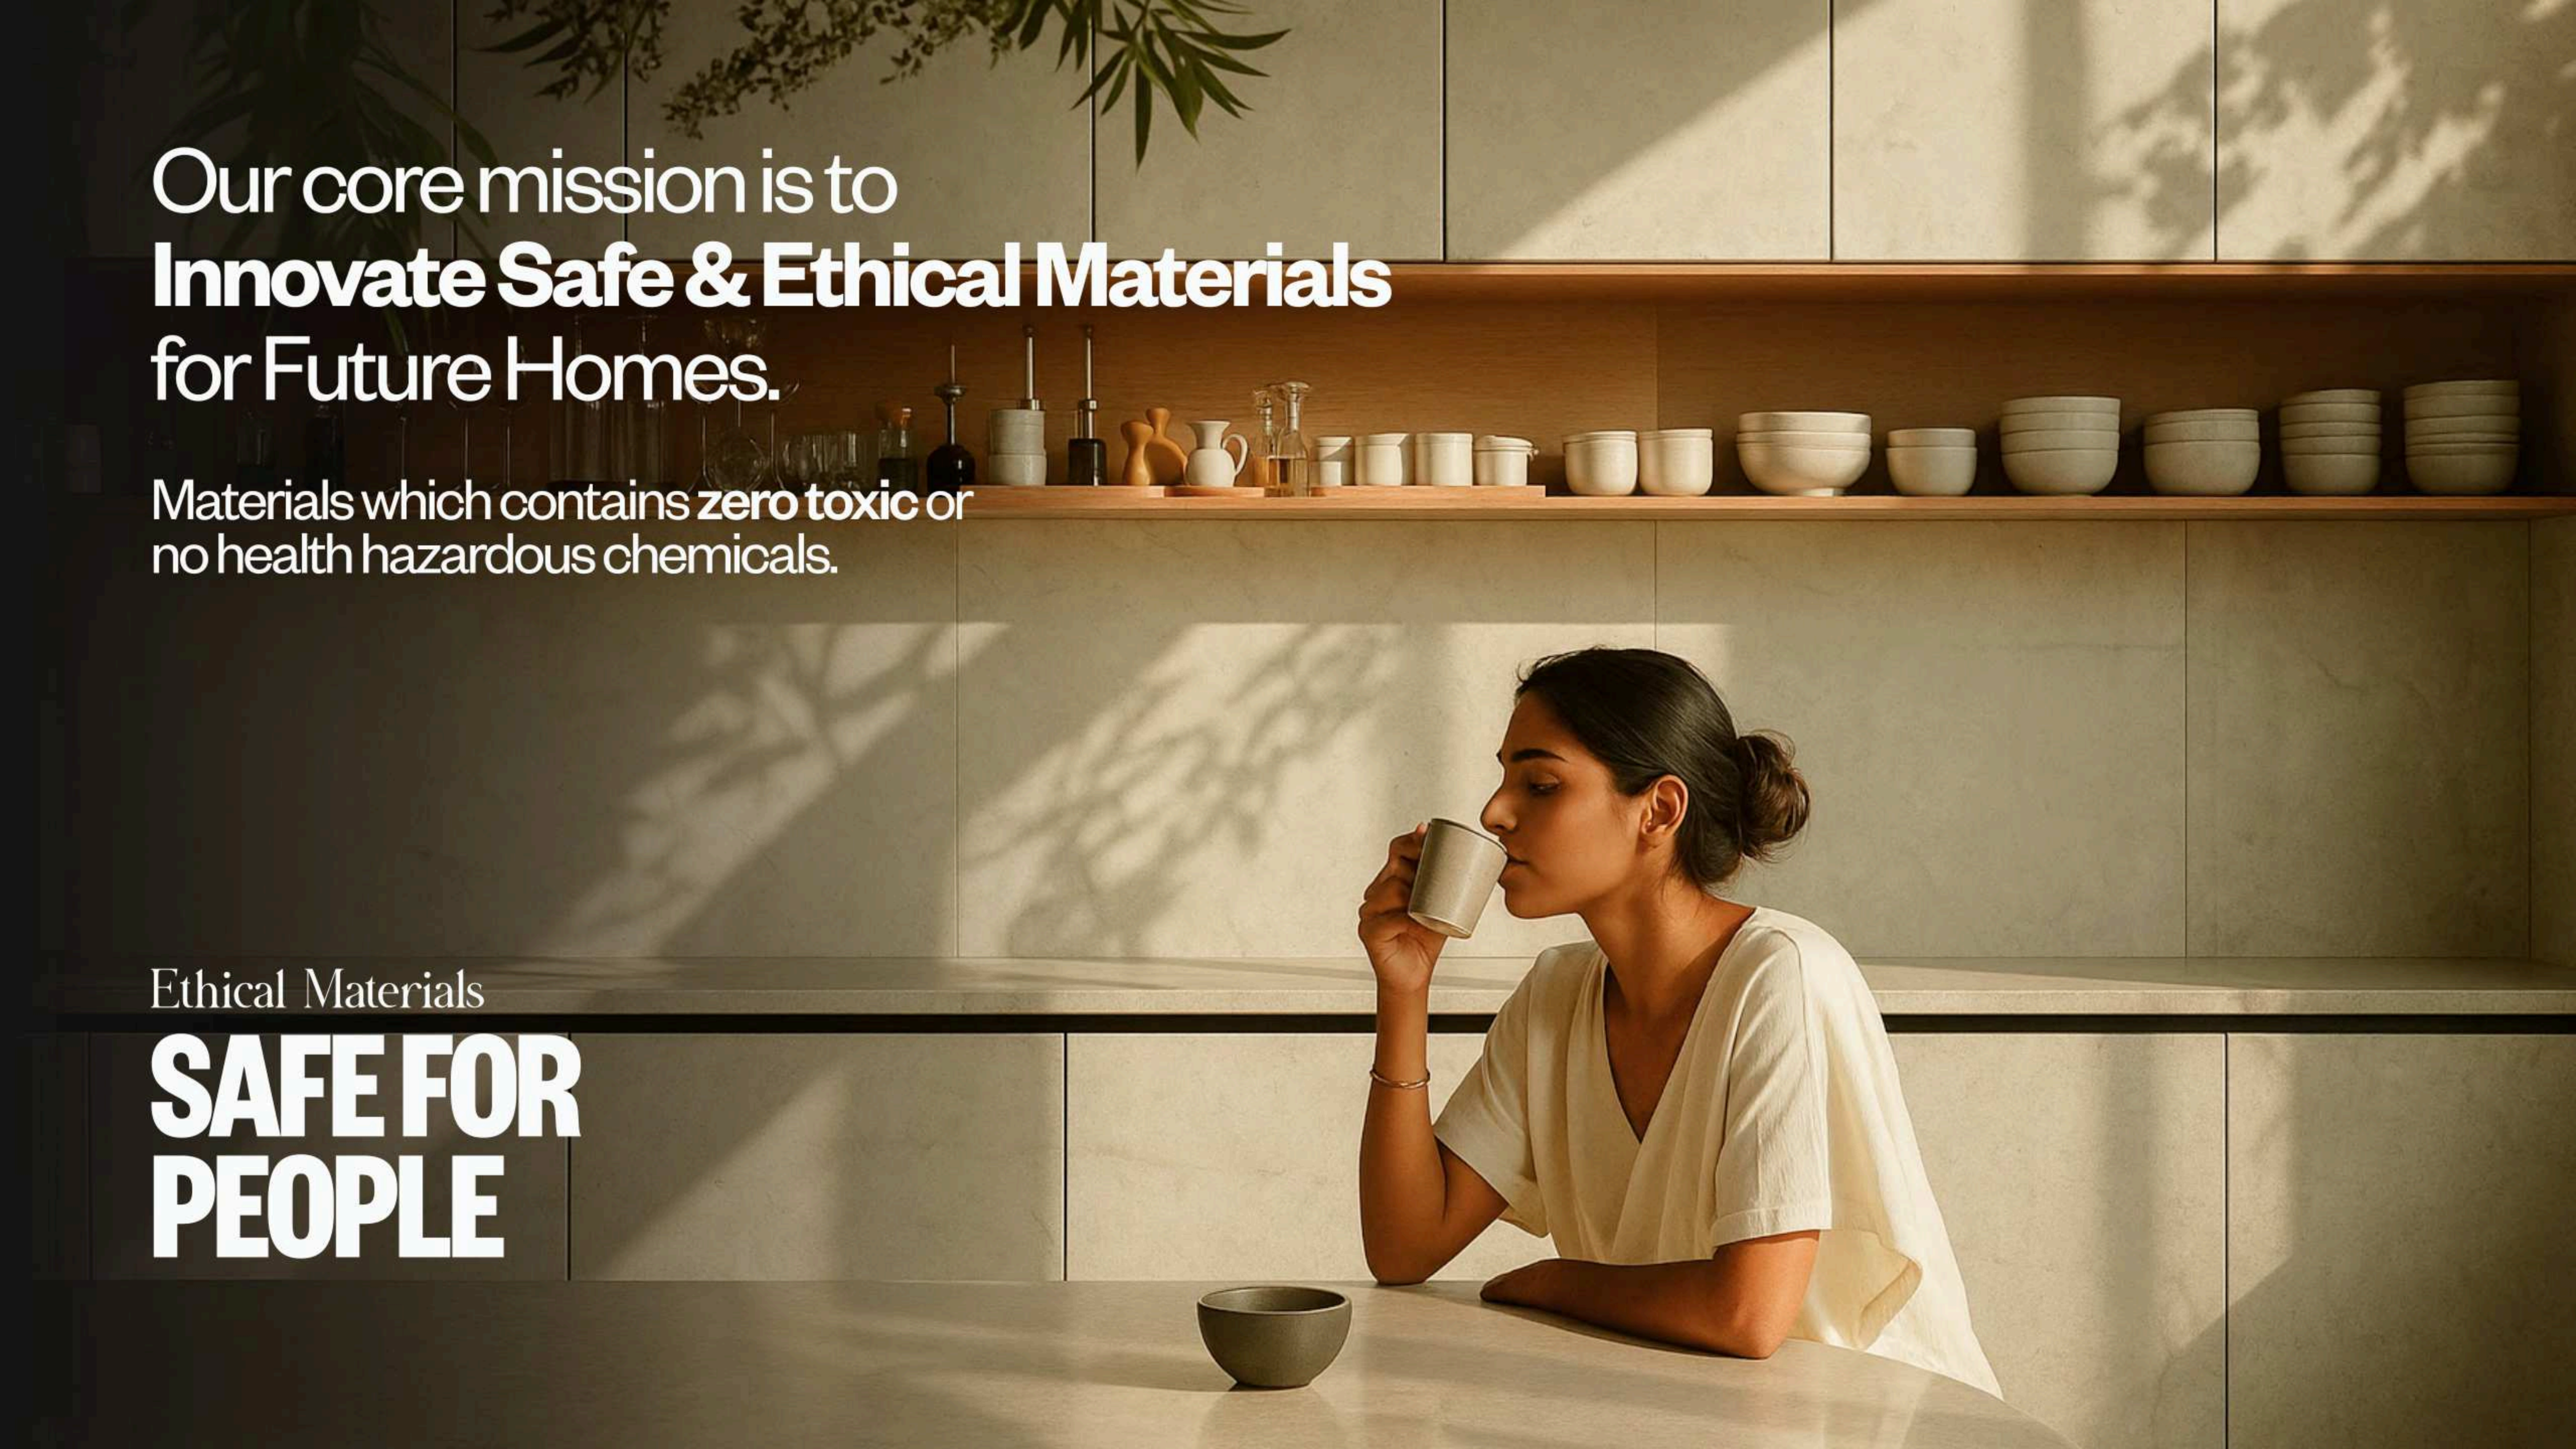

American Institute for
Cancer Research

UNSAFE

THE BIGGER PROBLEM

Not only these materials are destroying the health of our families today, they are also destroying the health of our future generations.

Deforestation is moving towards a barren oxygen depleted planet.

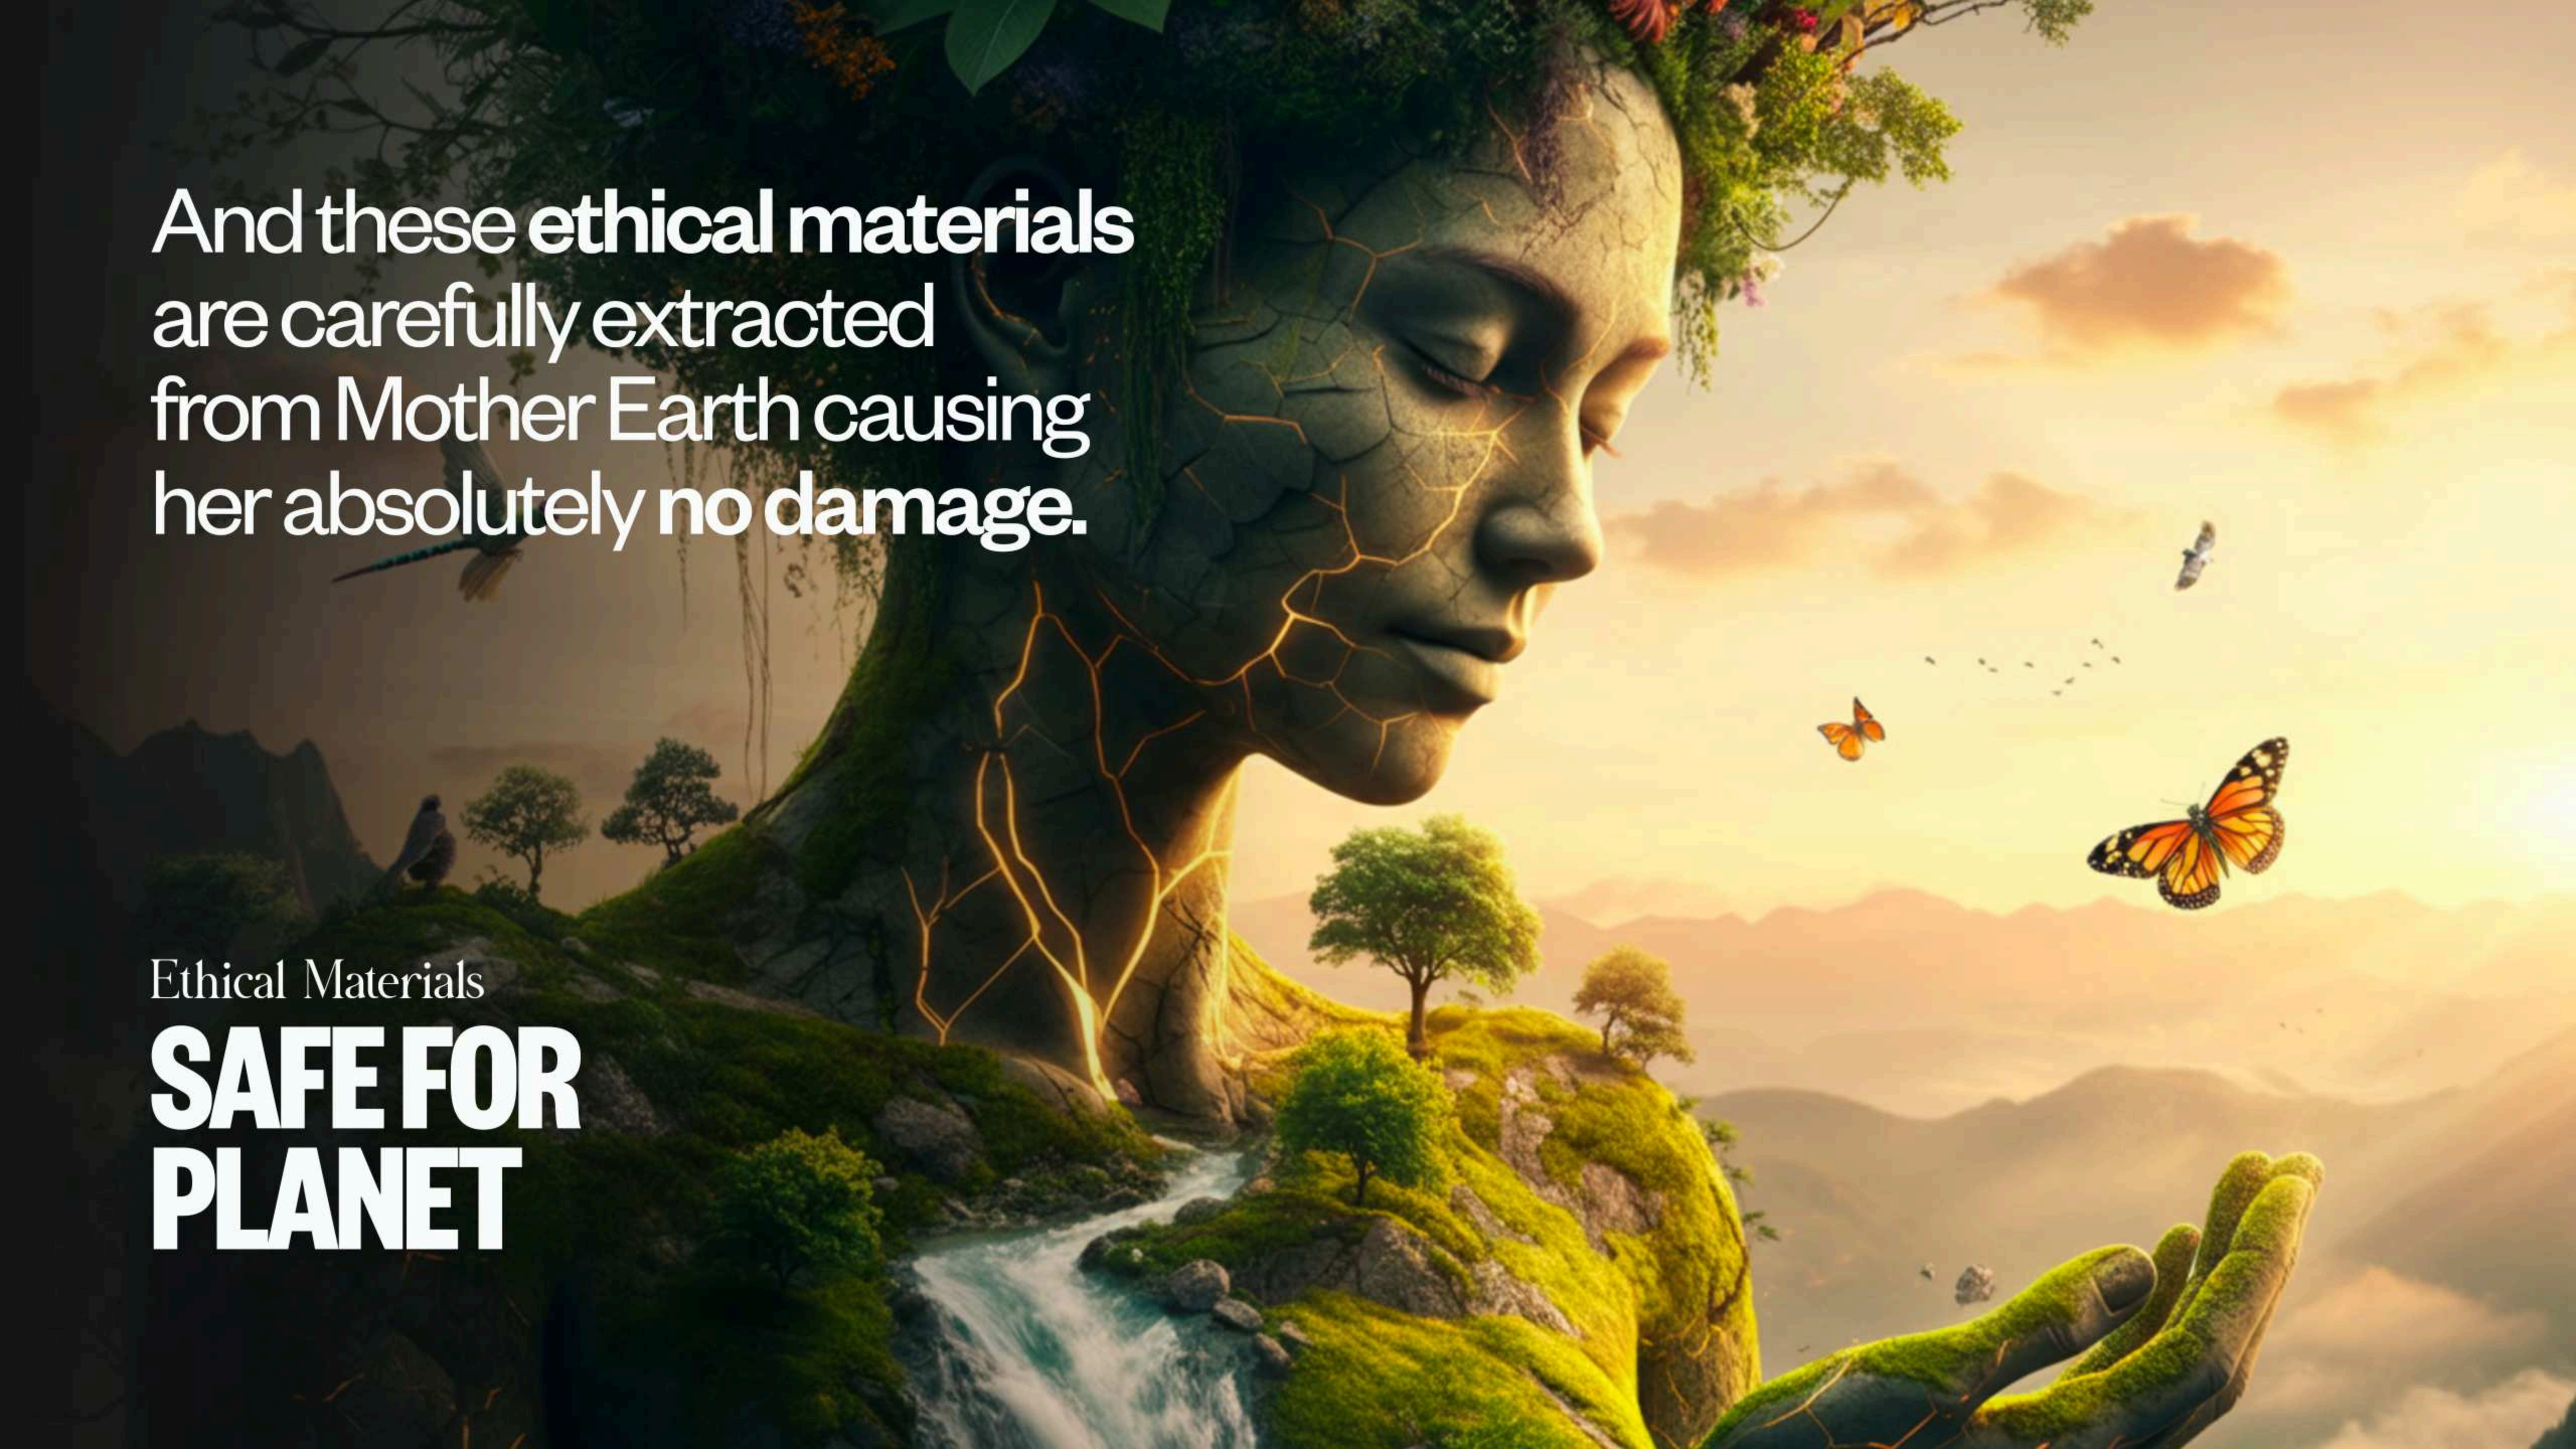

Our core mission is to
Innovate Safe & Ethical Materials
for Future Homes.

Materials which contains **zero toxic** or
no health hazardous chemicals.

Ethical Materials

**SAFE FOR
PEOPLE**

And these ethical materials
are carefully extracted
from Mother Earth causing
her absolutely no damage.

Ethical Materials

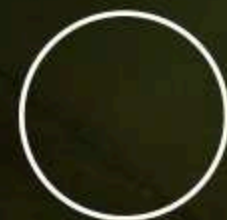

**SAFE FOR
PLANET**

It is time to treat
our homes as an
**Investment in
our health.**

Not just in design

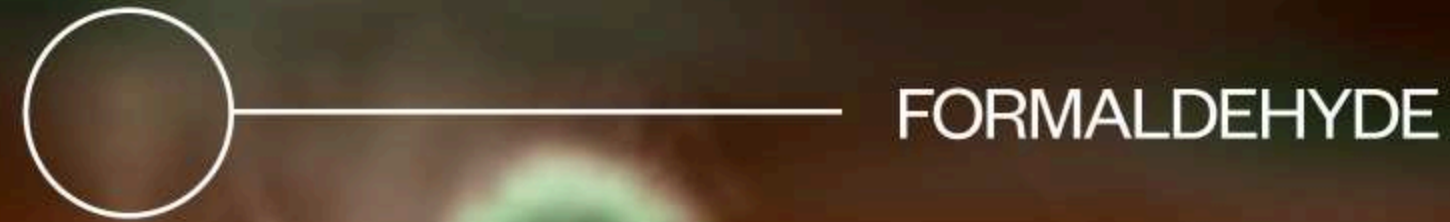

Ordinary homes are made with wood,
marble, and toxic chemicals.

FROM TOXIC WOOD

TO SILVERSTONE

The **Toxic materials** used in most homes are **Silently Killing Us.**

FORMALDEHYDE

FUNGAL
MOULD

**Most Indian kitchens
use MDF or plywood.**

There is a Toxic Chemical that resides in the pores of MDF and plywood and its called **FORMALDEHYDE.**

These materials leak formaldehyde - a chemical linked to respiratory illness, cancer, and asthma.

It's the Formaldehyde

What is Formaldehyde and Why Does it Matter?

Formaldehyde is a toxic chemical commonly found in the glue used to make compressed wood **things like MDF, plywood, and particle board**. These are the most widespread materials in Indian kitchens and homes.

You can't see it
but you can smell it
and you're **breathing** it
every single day.

A man in a white bathrobe stands in a dimly lit room, looking into an open wooden closet. Inside the closet, there are folded white towels on a shelf and several shirts hanging on a rack. A thick plume of white smoke or steam is rising from the closet, filling the left side of the frame. The scene is dimly lit, with the primary light source coming from the closet's interior light.

Formaldehyde is linked to asthma, cancer, and skin damage.

Even global health bodies like **WHO** and the **American Cancer Institute** have flagged formaldehyde as a known **carcinogen**. It's linked to skin damage, asthma and cancer.

Yet most people use these Toxic Materials that contain this Dangerous Chemical everywhere.

These **Toxins** leak into your air
and stay there for years.

This isn't a one-time threat.
The formaldehyde inside your home
keeps leaking for decades **making you sick.**

You can't see it but you can smell it.

YOU INHALE IT IN YOUR
KITCHEN

It also **leaks**
into your clothes
inside your
plywood
wardrobes and
**absorb the
formaldehyde**
for weeks and
months.

Your clothes absorb
formaldehyde for weeks.
Then your skin absorbs it
through every pore.

YOU INHALE IT IN YOUR
WARDROBE

Prolonged exposure to **FORMALDEHYDE** has been linked to:

Headaches, Fatigue,
Eye irritation

Respiratory issues,
Sinus and Asthma

In extreme long-term
cases, even cancer

We have been harming
nature by cutting so many
oxygen giving trees just to
make our homes pretty.

It's not just unsafe
It's Violent

We have been blasting mountains,
harming our mother earth just to
have shiny kitchen and flooring
marbles!

It's not just reckless
It's Ungrateful

If we continue building like this, we're deciding what kind of future the next generation will have.

Are we planning **a toxic home** for our grandchildren?

We felt the need to create a material that can replace compressed wood panels that are full of cancer causing substances and comes from cutting our oxygen giving trees.

And at the same time, **A Material that can replace natural granites,** stones and marbles which come from blasting our mountains.

So after years of research in Spain,
we innovated a special material
and we named it **SILVERSTONE**™

What is **SILVERSTONE**

A new-age material designed to help you build homes that are **safe and sustainable.**

SILVERSTONE is a revolutionary material born from nature without harming it.

World's first Wellness Stone
by **MAGPIE**

SILVERSTONETM is **Stronger than Granite**

Silverstone is engineered and it
outperforms every other material.

Unlike granite,
it doesn't crack.

SILVERSTONE

GRANITE

SILVERSTONETM looks
Better
than Marble
Performs even better.

Silverstone isn't mined it's
made. Engineered to be
smoother, glossier, and more
refined than natural marble.

No cracks.
No flaws.
No compromises.

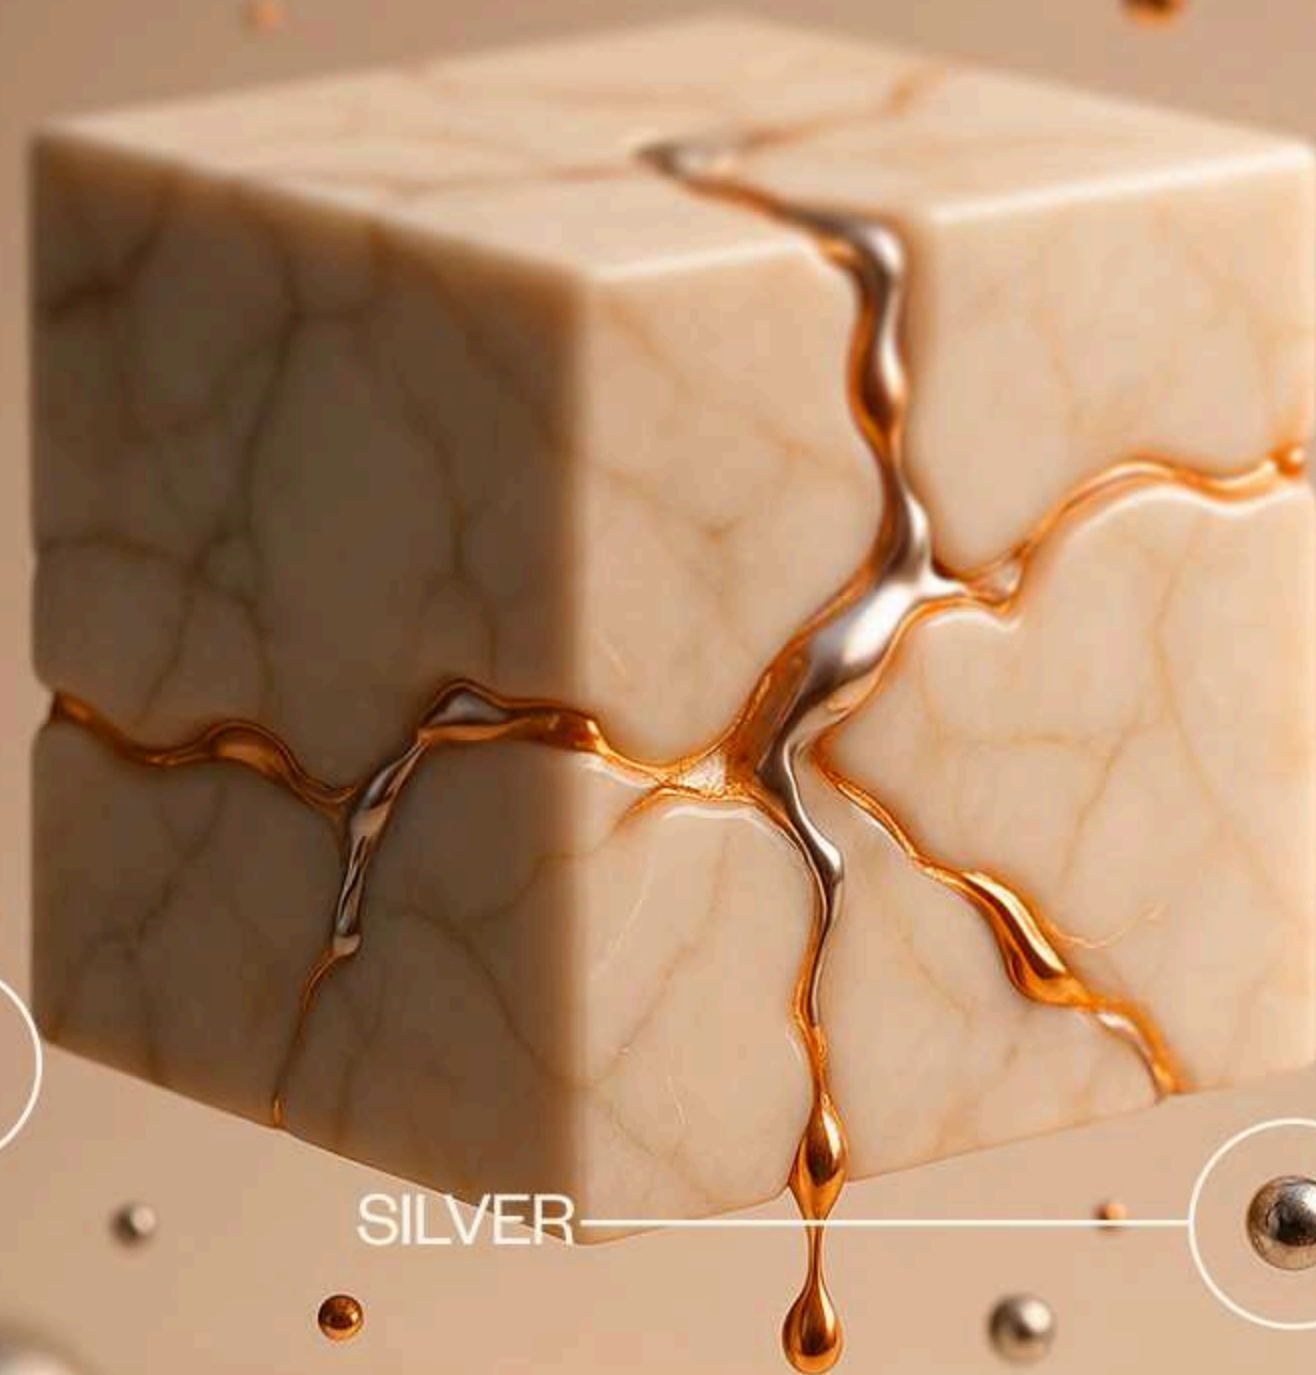

SILVERSTONE[™] is **Infused with Silver & Copper particles** for health.

Using advanced nanotechnology,
we've infused the surface with
silver and copper to naturally fight
bacteria and fungi.

COPPER

SILVER

**SILVERSTONE[®] is
Made from
natural clay in
factories.**

Compressed at 1300°C.

**Silverstone is created from the
Earth without harming it.**

It is created from the top layer of
the soil, which requires no mining
or no deforestation, hence does
not harm the Earth in any way.

SILVERSTONETM is
Built Without Harming

Without deforestation.

Without blasting.

Without mining.

It fully replaces wood that is toxic for our
homes without cutting a single tree.

MAGPPIE Kitchens are smarter,
safer, and stronger in every way.

Built for Wellness. Designed to Last.

Our kitchens are beautiful but they're
also engineered for convenience.

SILVERSTONE
BENEFIT #1

MOULD SAFE

In humid cities like Miami, molding within cabinets is a serious risk. That is why many architects there are choosing Silverstone as a reliable alternative. Silverstone is completely non porous, which keeps homes mold free.

A hand is shown wiping a spill on a highly reflective, polished surface with a white cloth. The spill consists of a mixture of paint and water. In the background, there are several glass jars containing paintbrushes and other art supplies, suggesting an artist's studio or workshop. The lighting is warm and directional, coming from the right, which creates strong highlights and reflections on the surface.

SILVERSTONE
BENEFIT #2

EASY TO CLEAN

The Silverstone's smooth and non porous surface does not need any harsh cleaners, toxic sprays, or polishing. Most stains wipe away with a quick swipe. Silverstone is very easy to maintain and does not require high maintenance.

SILVERSTONE
BENEFIT #3

BREAKAGE SAFE

Magppie Kitchens drawers can hold up to 100 kgs each, unlike regular ones that bend or break when loaded with heavy utensils. They remain strong and stable because of our patented hardware and advanced slide system, designed to carry heavy weights without causing loose hinges or long term damage.

SILVERSTONE
BENEFIT #4

FORMALDEHYDE SAFE

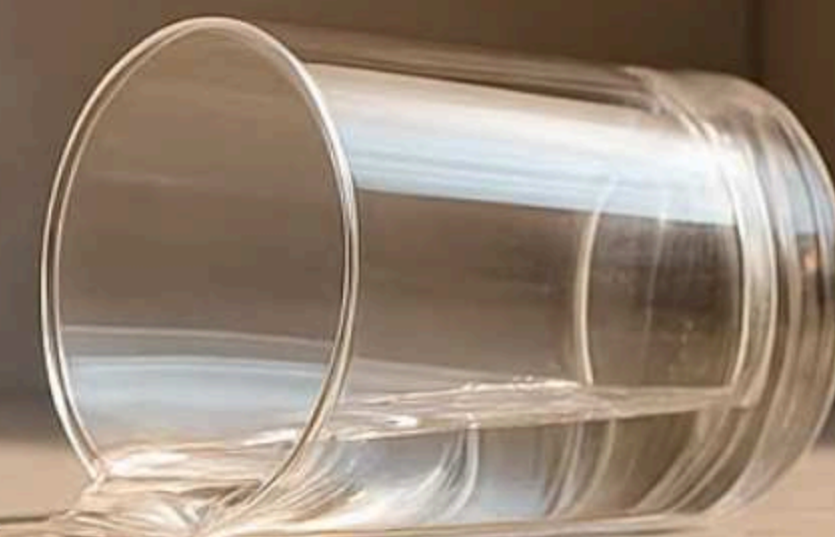

Magppie kitchens and wardrobes made from Silverstone are 100 percent formaldehyde free. Conventional kitchens made from compressed wood panels release formaldehyde, a chemical classified as cancer causing by the World Health Organization. In heat and steam, it seeps into food in kitchens and from wardrobes into clothes and skin. With Magppie, you and your family are completely safe from these toxic fumes.

SILVERSTONE
BENEFIT #5

WATERPROOF

You can wipe or wash our kitchens made from Silverstone and they will never swell, soften, smell, or breed bacteria. That makes them one of the best options for kitchen cabinets, wardrobes, bathrooms, or any humid environment.

SILVERSTONE
BENEFIT #6

SCRATCH SAFE

Silverstone resists scratches from daily use, so even dragging utensils or heavy items leaves no marks. This ensures your kitchen stays flawless no matter how often it is used and never looks worn out.

SILVERSTONE
BENEFIT #7

FIRE SAFE

Silverstone is completely safe from fire and does not burn or spread flames. It has become one of the most trusted materials in fire prone regions like California, where forest fires are increasingly common. And since the kitchen is the one place in the home where fire is used daily, Silverstone ensures maximum safety for your family.

SILVERSTONE
BENEFIT #8

IMPACT RESISTANT

Silverstone kitchens are built to resist heavy impact. They do not chip or crack easily, even when heavy cookware or utensils fall on them. In comparison, traditional marble and other conventional materials are prone to visible damage under the same conditions. This durability ensures long term strength and stability in everyday use.

SILVERSTONE
BENEFIT #9

GERM SAFE

Our patented Silverstone is infused with silver and copper nanoparticles. This infusion makes the surface naturally antibacterial, so bacteria cannot survive on it. For centuries, silver and copper have been trusted for their germ fighting properties, and Silverstone brings that same protection into your kitchens and wardrobes.

SILVERSTONE
BENEFIT #10

TERMITE SAFE

TERMITES
EAT WOOD

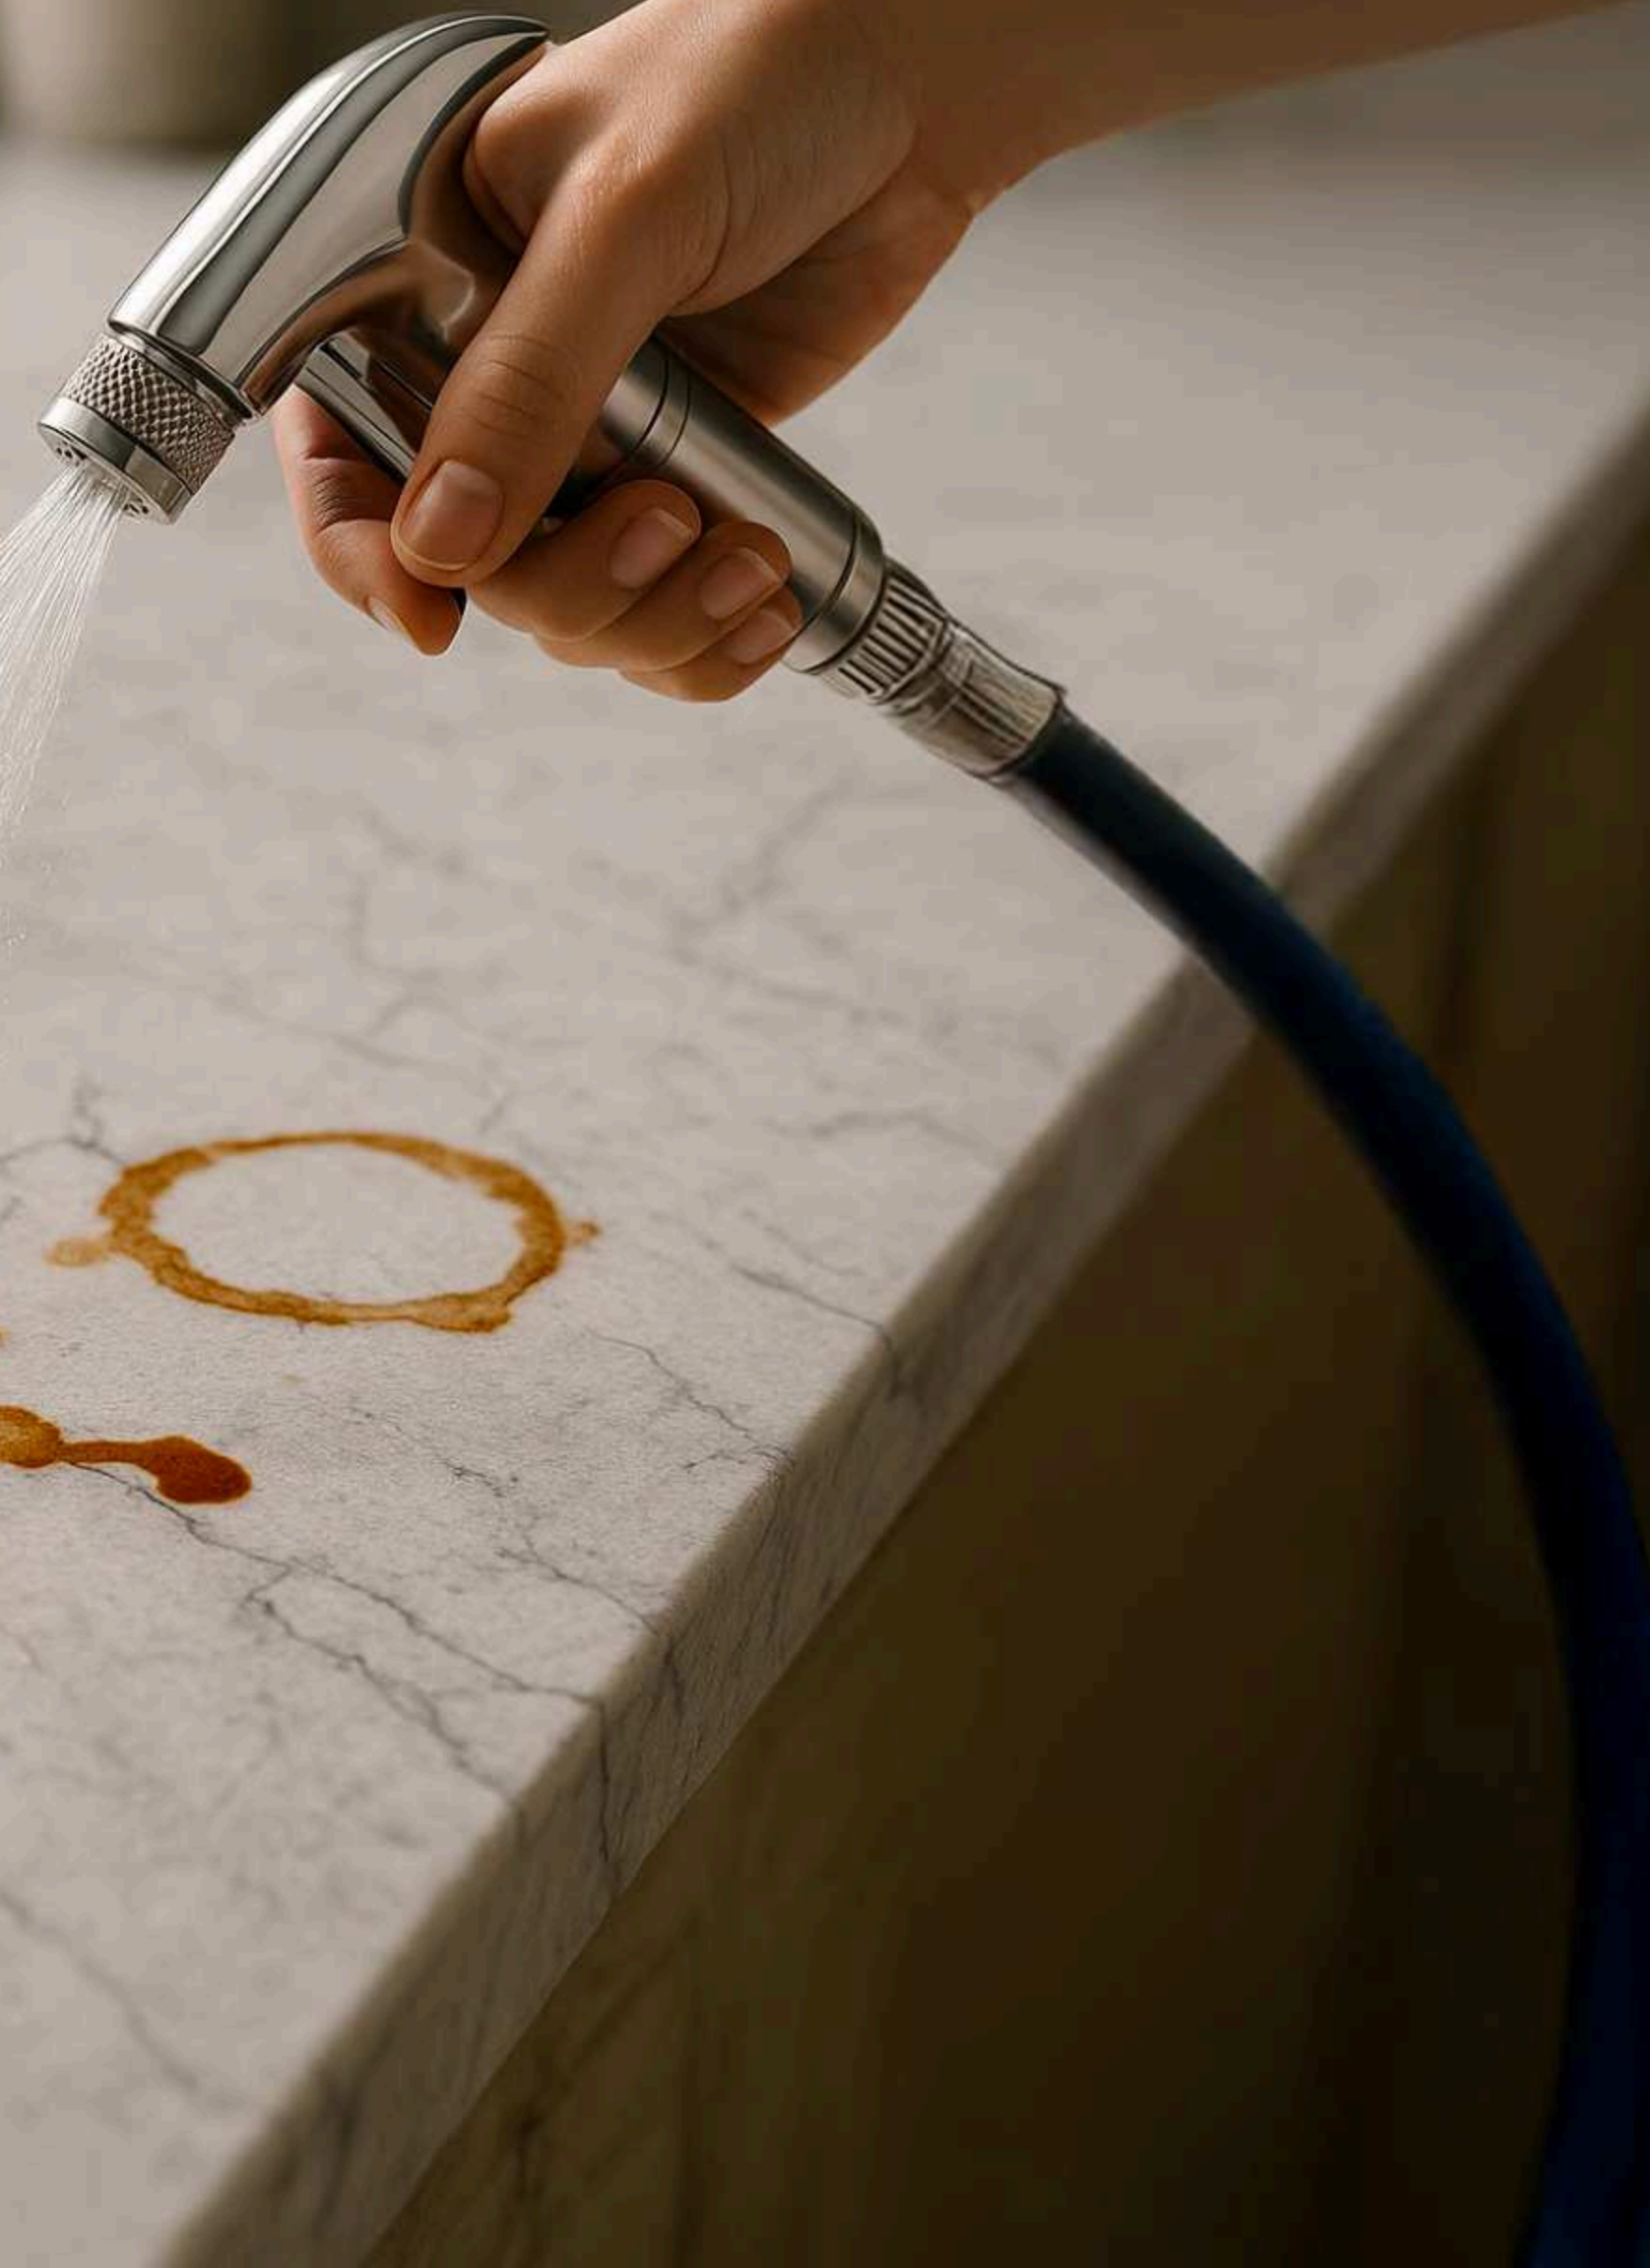

Kitchens and wardrobes made from Silverstone are completely termite proof, and we back this with a 25 year guarantee. Unlike conventional materials such as compressed wood, Silverstone does not allow any termite infestation and stays termite free for life.

SILVERSTONE
BENEFIT #11

STAIN SAFE

Silverstone is highly stain resistant because it is completely non porous. Haldi, oil, tea, perfumes, or even wet clothes leave no marks or odor. Nothing gets absorbed. With just a quick wipe, the surface becomes spotless again.

SILVERSTONE
BENEFIT #12

25 Year Guarantee with Complimentary Service

ONE FREE SERVICE,
EVERY SINGLE YEAR.

Our kitchens come with a 25 year guarantee, which includes one complimentary service every year. At Magppie, we want to care for not just you but the next three generations. This annual service ensures your kitchen always stays in perfect condition and continues to keep your family safe.

Applications of **SILVERSTONE** in **Wellness Homes**

Wellness Bathroom

MAGPIE VERONICA
TEXTURE : HIGH GLOSSY

A wide-angle photograph of a modern outdoor terrace. The terrace floor is made of large, light-colored marble tiles with a high-gloss finish. A long, low wicker sofa with light-colored cushions and blue and yellow throw pillows is positioned against a wall of white marble cladding. In front of the sofa is a rectangular marble coffee table with a thick top and a pedestal base. On the table are several items: a small bowl of fruit, a large orange ceramic mug, and two small white cups on saucers. The terrace is bordered by a dark metal railing. To the left of the railing, there are lush green plants and yellow flowers. In the background, a vast, hazy mountain valley stretches out under a cloudy sky. A single tree stands near the end of the terrace.

Wellness Wardrobe

MAGPPIE TAJ
TEXTURE : HIGH GLOSSY

A man with a beard, wearing a polka-dot headband and glasses, is leaning over a white marble table. He is sprinkling a fine white powder (likely salt or sugar) onto a small dish of food. The dish contains a slice of bread topped with a fried egg, vegetables, and herbs. There are two other similar dishes on the table, and two empty plates. The background is a blurred landscape with green hills and a bright sunset sky.
